

Immediate actions upon seeing a problem or symptoms

Call a Vet or after-hours emergency pet center. Write the numbers below:

Vet _____

After-hours emergency number _____

If you need to induce vomiting: 1 tablespoon of hydrogen peroxide per 20 pounds of body weight. Use turkey baster or syringe to get it down the throat. Wait 15 minutes and repeat if the dog doesn't vomit from first dose. Do not administer a 3rd dose

If you go to the vet, call en-route to let them know you are coming and why. Collect any wrappers, seeds, etc of that will help the vet understand what the dog ate.

ASPCA poison control hotline available 24/7/365 (888) 426-4435
